SUMMARY

Senior software engineer with 11+ years building production systems across SaaS, payments, and telecom. Lead five engineers delivering a Spring Boot platform, owning backend architecture, cloud deployment, and production operations. Experience includes Java 21 services, REST APIs, Kafka pipelines with approximately 50% lower processing latency, and close collaboration with frontend engineers to deliver complete features.

TECHNICAL SKILLS

Java & APIs: Java (including Java 21), Spring Boot, Spring Cloud, Hibernate, REST API design, API gateways, Gradle, Jackson

Architecture & Messaging: Microservices, distributed applications, event-driven architecture, Apache Kafka, Kafka Connect, CQRS, Axon Framework, NATS JetStream

Cloud & Delivery: AWS, Kubernetes, Docker, Docker Compose, Terraform, GitHub Actions, CI/CD

Data: PostgreSQL, MySQL, MongoDB replica sets, Redis

Performance & Operations: Grafana k6, load testing, Grafana, logging, alerting, incident response

Collaboration: Team leadership, backend architecture, frontend mentoring, micro-frontends, API integration

PROFESSIONAL EXPERIENCE

Aspire Tech Services and Solutions Corp. (US-based client)

Senior Software Engineer | Jun 2025 - Present | Remote, Dhaka

- Lead five engineers delivering ASAT-V2, a security-awareness SaaS platform, owning backend architecture and delivery from Spring Boot development through production operations.
- Built Spring Boot REST APIs for authentication, billing, phishing simulations, notifications, and reporting; integrated Stripe and PayPal with coupon, VAT, and discount calculations.
- Designed the API gateway and campaign orchestration across email, SMS, and voice simulations, integrating delivery providers and capturing participant responses for risk reporting.
- Own production infrastructure and DevOps operations, including development, test, and staging server setup, deployment environment preparation, and service releases.
- Maintain GitHub Actions CI/CD pipelines for Gradle builds, container deployment, and versioned rollback; the backend deployment workflow includes unit, integration, and functional test stages.
- Operate services on AWS with Grafana dashboards, logging, alerts, and incident response; use Grafana k6 for load testing and performance analysis.
- Provision AWS infrastructure with Terraform and maintain Docker, Docker Compose, and Kubernetes deployment configurations; configured a three-member MongoDB replica set with automatic failover.
- Mentored frontend engineers on micro-frontend design and implementation, aligning backend APIs and UI workflows across phishing, billing, and training modules.
- Reduced JavaScript asset loading time by approximately 50% by moving asset delivery to Amazon S3 and CloudFront.

Verbex

Senior Software Engineer | Aug 2023 - Jun 2025 | Dhaka, Bangladesh

- Built seven Spring Boot services for a conversational voice AI platform using Java 21, Axon Framework, and CQRS, covering agent management, call orchestration, and transcription analysis.
- Built a Kafka and Kafka Connect data-warehousing pipeline, reducing processing latency by approximately 50% for downstream analytics.
- Developed a custom Kafka Connect transformation plugin to reshape complex source data for BI dashboards.
- Implemented GitHub Actions pipelines with Docker and Kubernetes for containerized service deployments.

Dotlines Bangladesh

Senior Software Engineer | Nov 2020 - Aug 2023 | Dhaka, Bangladesh

- Developed Java payment-gateway services deployed on Grameenphone and Banglalink platforms, integrating multiple third-party payment providers.
- Built a C-based SMSC using SMPP, SS7, and SCTP, handling 3,000 TPS and reducing per-message routing costs by 90% compared with third-party providers.
- Developed an asynchronous outbound-call gateway using Python, FastAPI, asyncio, and NATS JetStream to increase parallel call-processing capacity.

SSD-TECH

Software Engineer | Feb 2015 - Nov 2020 | Dhaka, Bangladesh

- Developed SMS delivery systems in C and PHP with MySQL and Redis, running on Banglalink's production platform at 2,000 TPS.
- Built reusable SMPP and SIP libraries in C for multiple telecom projects; implemented call-patching and conference-call features using Asterisk.

EDUCATION

Bachelor's in Computer Science and Engineering | 2010 - 2014

Chittagong University of Engineering and Technology (CUET), Chittagong, Bangladesh

CERTIFICATION & LANGUAGES

Splunk Certified Cybersecurity Defense Analyst

Bengali: Native | English: Fluent
